

INTRO TO SURF HPC CLOUD

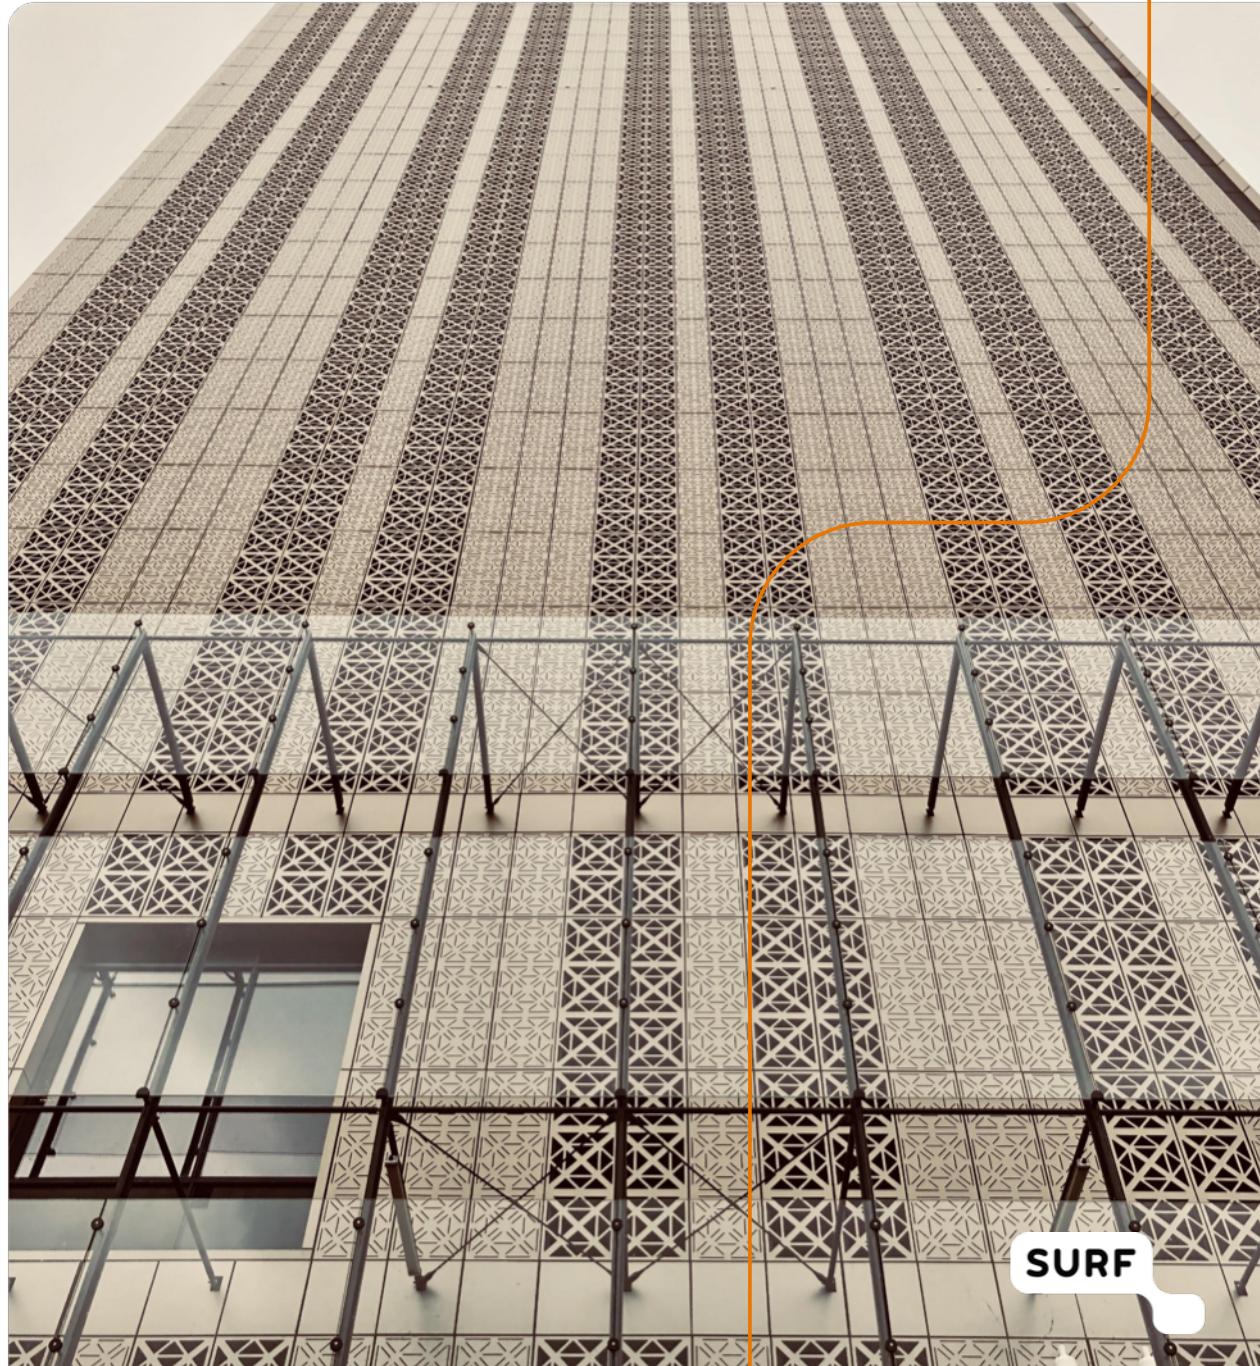

By Nuno Ferreira

ANDER ASTUDILLO
CARSTEN SCHELP

SURF

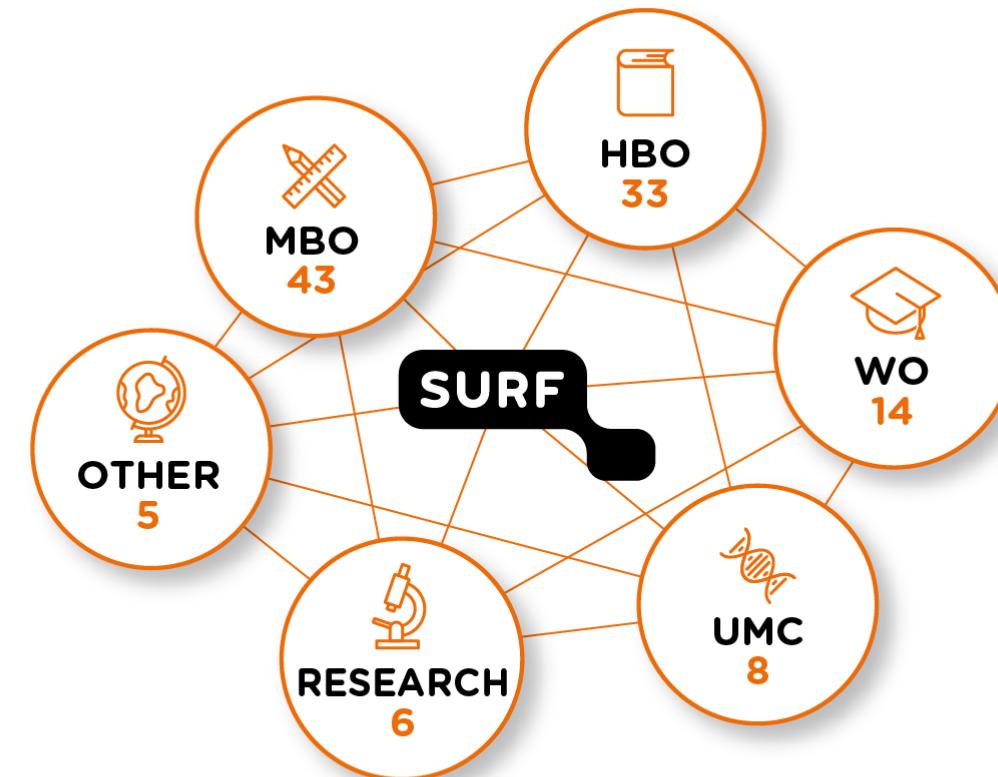

Agenda

- **09:00** An introduction to SURF HPC Cloud
- **09:20** Demonstration
- **09:45** Hands-on
- **12:00** Break
- **13:00** Cloudifying – parallelism & API
- **13:45** Hands-on
- **17:00** End

We are SURF

WO: Research-oriented higher education
HBO: Higher professional education
MBO: Vocational education and training
UMC: University teaching hospital

What SURF does for research

- **High-end Compute services**

- Supercomputing
- Cluster computing

- **Data processing & analysis**

- Scalable data analytics
- Grid services
- Infrastructure as a Service
- Visualisation

- **Data storage & management**

- Online data services
- Data preservation services
- Data management services

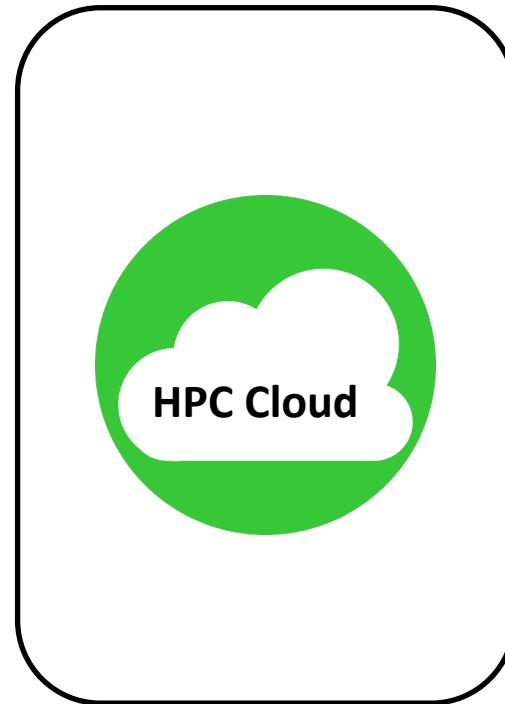

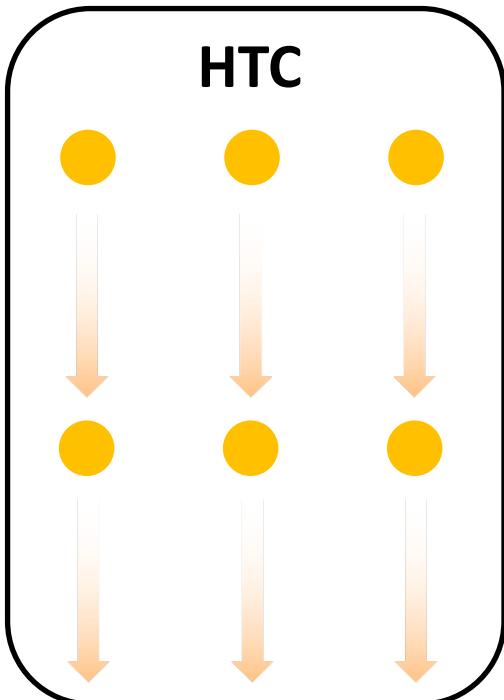

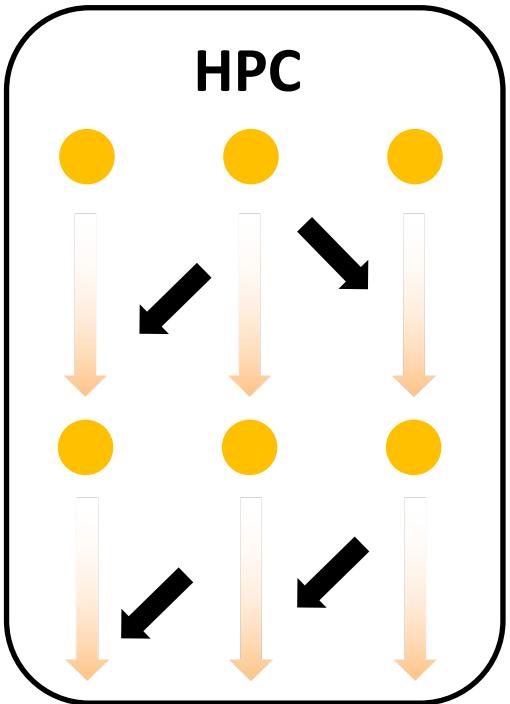

- **Network & collaboration services**

- Fast networks for data transfers and compute scale out
- Federated access & identity management solutions

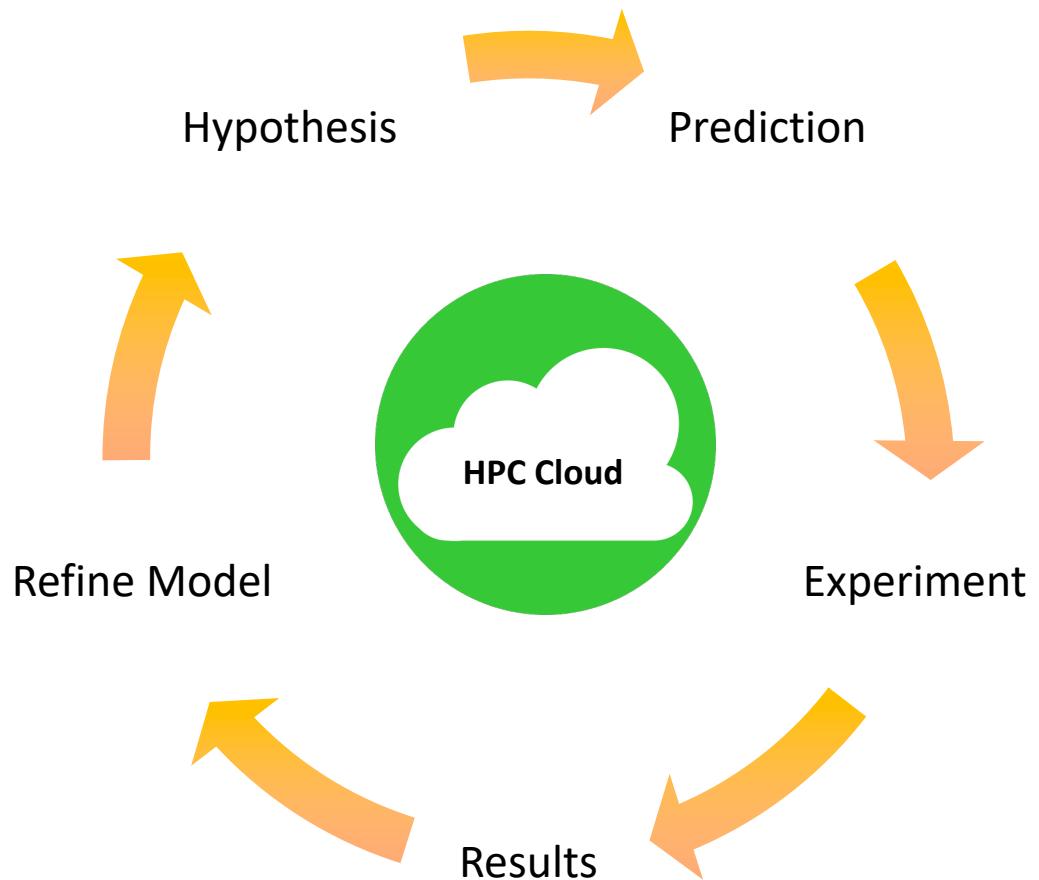

For more information: surf.nl/research

Why different services?

The Scientific Method

“Failure is a data point!”
By Andy Jassy, CEO AWS

What is Cloud Computing?

“Ask 10 people what the cloud is, get 11 answers.” [?]

“Cloud computing is a model for enabling ubiquitous, convenient, on-demand network access to a shared pool of configurable computing resources (e.g., networks, servers, storage, applications, and services) that can be rapidly provisioned and released with minimal management effort or service provider interaction.”

Essential Characteristics

- On-demand self-service
- Network access
- Resource pooling
- Elasticity
- Measured service

Service Models

- Software as a Service
- Platform as a Service
- Infrastructure as a Service

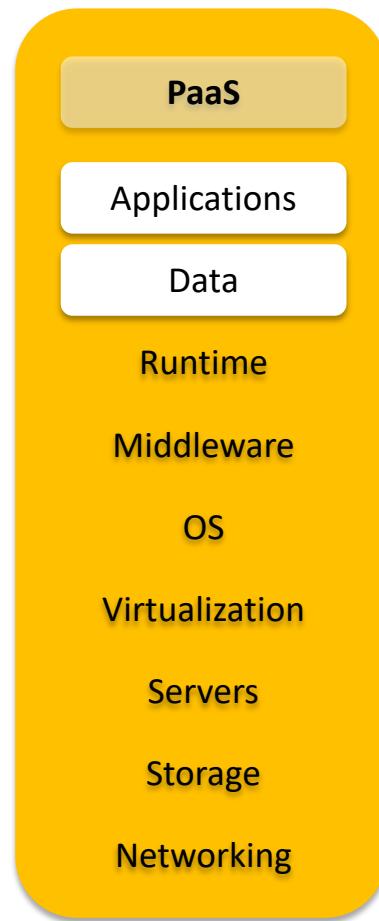

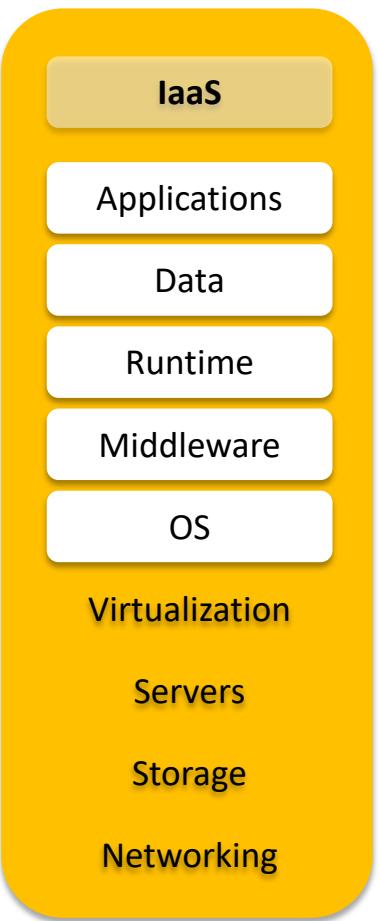

Pizza as a Service

HPC Cloud Resources

Compute Nodes

	#	CPU	Memory	Storage	GPU
Intel(R) Xeon(R) CPU E5-2698 v3 @ 2.30GHz	21	32	256GB	3.2TB	
Intel(R) Xeon(R) CPU E5-2698 v4 @ 2.20GHz	10	40	512GB	3.5TB	
Intel(R) Xeon(R) Gold 6148 CPU @ 2.40GHz	7	40	576GB	3.0TB	
Intel(R) Xeon(R) CPU E5-2640 v3 @ 2.60GHz	6	32	256GB	800GB	4 (Nvidia GRID K2)
Intel(R) Xeon(R) CPU E5-2609 v4 @ 1.70GHz	2	16	128GB	800GB	4 (Nvidia Tesla P100)

Storage Nodes

510 TB Ceph * 3 redundancy

Network

2 * 10 Gbit

SURF HPC Cloud: (some) expectations

- **Benefits**

- Data & Computing in Dutch soil
- Unrestricted internet access
- Flexibility: tailor made your VM
- ISO 27001 & GDPR compliancy

- **Shortcomings**

- No 24/7 Helpdesk
- You own your VM
- Accounting based on VM uptime

Interact with HPC Cloud
