# SURFsara's HPC Cloud service

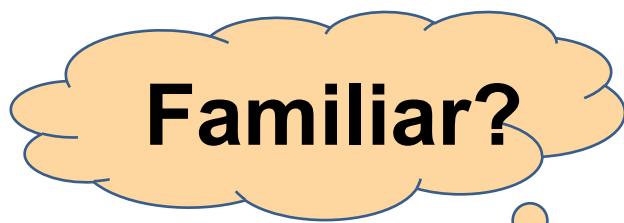

# What do we (SURFsara) want to offer?

## Services for **scientists** ...scientists $\neq$ systems gurus

... complex users' problems

- **Data:** big, dirty, non-structured...
- **Computation:** complex (e.g.: modeling, simulation)
- Libraries nightmare
  - 3rd party, incompatibility, maintenance...

# What does our HPC Cloud offer?

# What do you see, as a user?

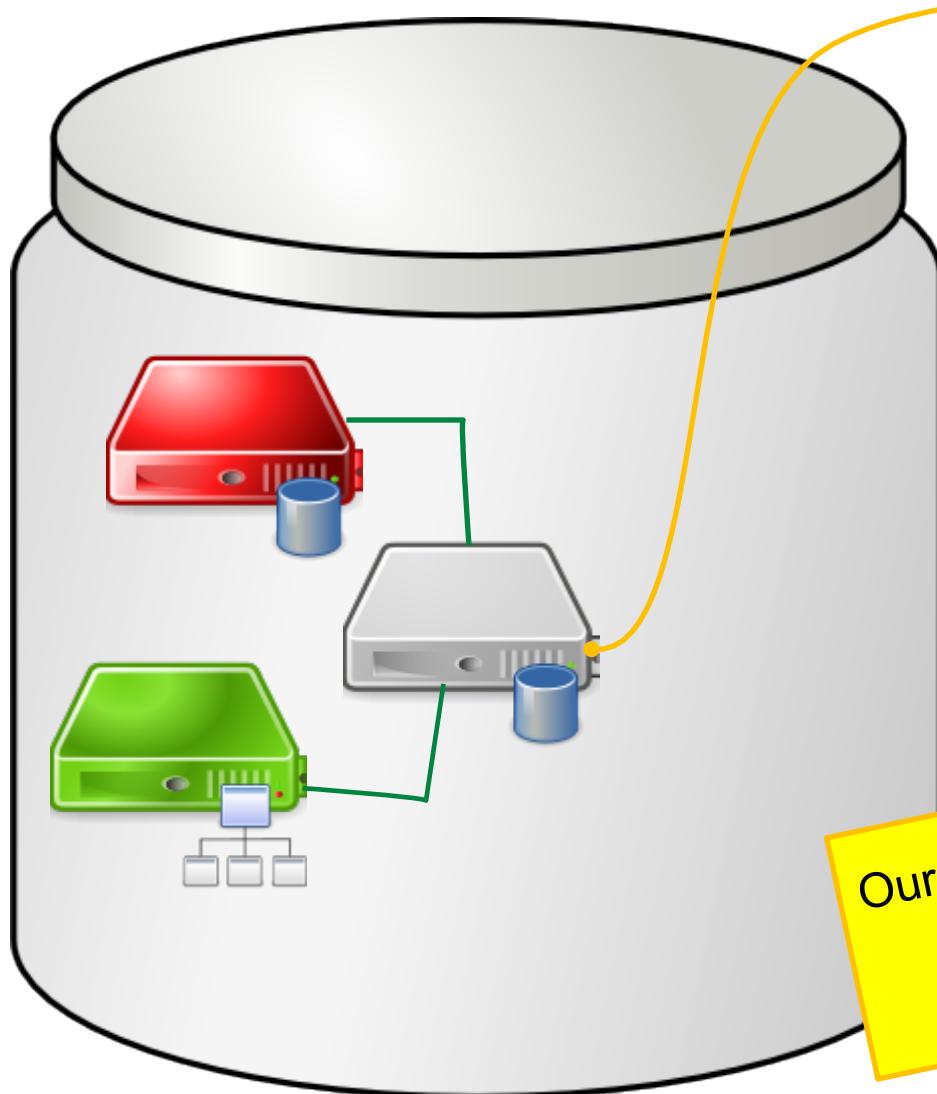

**A place to build a running system**

Build your own (virtual) machine:

- Hardware
  - CPU
  - Memory
  - Input/Output
    - Disk
    - Network interfaces
- Software
  - Operating System
  - Programs
  - Libraries

# What do you see, as a user? (and II)

A place to build a bunch of systems

Build your own cluster:

- Private network
- Internet access
